

Project Design Phase-I  
Solution Fit Document and Solution Architecture

Date: 19 September 2022

Team ID: PNT2022TMID10160

Project Name: Real Time Communication System Powered by AI for Specially able

## Problem-Solution fit canvas 2.0

Define CS, fit into CC	<b>1. CUSTOMER SEGMENT(S)</b> <b>CS</b> <p>The impaired people(Speak &amp; Hear) could only communicate through sign language. But not all normal people know to communicate with the specially abled people</p> <p>Both the normal and impaired people can make use of it.Children who are specially abled shall be guided to communicate through this platform with the help of the adults.</p>	<b>6. CUSTOMER CONSTRAINTS</b> <b>CC</b> <p>It is hard for the people who could not able to convey what they feel. This led anxiety and insecure to live in the society. Thus, preventing them from all the barriers to move along with the society.</p>	<b>5. AVAILABLE S</b> <p>The mode platform. converting versa. So, other.</p>
	<b>2. JOBS-TO-BE-DONE / PROBLEMS</b> <b>J&amp;P</b> <p>Impaired users are dependent to live in this society and find it difficult when there is no one to help. Communication is the only way that connects the people. Having an AI based application that can even translate to the appropriate language which can be understood between persons/users..</p>	<b>9. PROBLEM ROOT CAUSE</b> <b>RC</b> <p>This can be very effective if all the users knows to use the application, but if a person is not educated to operate the device to communicate will be a problem to utilise this solution. Thus, all users should be aware or be guided to use the applications.</p>	<b>7. BEHAVIOUR</b> <p>The user can for the caus or request f</p>
Focus on J&P, tap into BE, understand RC	<b>3. TRIGGERS</b> <b>TR</b> <p>Opportunities for the specially abled people is affected because of the communication. They are not able to reveal their talent and skills.</p>	<b>10. YOUR SOLUTION</b> <b>SL</b> <p>The solution is to use a AI based application system that detects the sign language which is then recognized and convert them into text, vice versa. The AI model is trained to detect the hand signs with the help of camera and then processess with the datas fed in the system.</p>	<b>8. CHANNELS o</b> <b>8.1 ONLINE</b> <p>Some users a process to fo</p>
	<b>4. EMOTIONS: BEFORE / AFTER</b> <b>EM</b> <p>BEFORE: Every individual people find it difficult to communicate and connect with people and become anxious.  AFTER: They become confident and could able to convey what they feel, which helps them to achieve things in many way.</p>		<b>8.2 OFFLINE</b> <p>Users need a p and be depend</p>
Identify strong TR & EM
